U.S.C. 31 AND 32 AS AMENDED. ITS TRANSMISSION OR THE REVELATION
OF ITS CONTENTS TO AN UNAUTHORIZED PERSON IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

1. One of the largest Yugoslav factories manufacturing glue, and starch is 2.5 kilometers south of the center of Zrenjanin, southwest of the Zrenjanin sugar refinery in Serbia. The factory is built in accordance with provisions of the Yugoslav Plan. The "Trudbenik" construction firm, 60 Jovanova Street, Belgrade, which has the reputation of being the best construction firm in Yugoslavia, supervised the building of the factory. According to sources, the factory is well situated, has access to electricity, water and land communications, and obtains its raw materials required primarily corn, from the agricultural area nearby. The technical director of the factory is a German engineer who is supervised by the Technical Bureau in Belgrade. Workers are well housed and fed.

Factory Lay Out

1. Administration building containing mess hall and kitchen, a single story stone building with a tile roof; 40 x 20 meters.
2. Warehouse for storing corn; three story building of modern reinforced concrete, flat concrete roof with asphalt insulation; 100 x 40 x 30 meters. This building has special corn bins, of reinforced concrete having a total capacity of 2,000 railroad carloads and special devices for transferring the corn by Corn is moved into the storage bins by mechanical loading devices from the top floor, where the corn is dried. The bins are emptied in the basement and is transported to building No. 3 from building No. 2 by way of a ground tunnel.
